Some ingredients used in everyday skincare products such as mineral oils might sound healthy, but can lead to serious long-term side effects and have even been linked to breast cancer.

Borne out of the age of information, Viniferosa is an all-natural skin rejuvenating formulation using essential fatty acids found in our select range of Omega oils.

Did you know, that every cell in your body needs essential fatty acids daily to maintain optimal health? That is approximately 37.2 trillion cells all needing essential fatty acids every day which can only be obtained from Omega oils.

Your skin being the biggest organ in the body, absorbs everything you put onto it, good or bad and all contribute to the amazing chemistry we call life?

**HOW OMEGA FATTY ACIDS HELP YOUR SKIN**

The research of Omega’s healthy fatty acids effect on skin is fascinating; in fact, it was this information which inspired us to formulate Viniferosa, a daily skin routine to deliver these remarkable ingredients which benefit all types of skin.

Adding a concentrated Omega fatty acid serum to your skincare routine, helps regenerate skin cells while repairing damaged skin tissue. You can also supplement and even enhance the results of other skin products, resulting in a visibly healthier skin.

Viniferosa offers powerful skin rejuvenation naturally, without being heavy or greasy. The all-natural formula is a powerful anti-aging tool, diminishing the appearance of existing wrinkles while reducing the formation of new ones, giving you a glowing, hydrated and younger looking skin.

Certified organic pure Rosehip and Grapeseed oil are rich in these essential oils and are known for their amazing benefits when applied to skin.
